## PROFILE

Lead AI Consultant with deep experience advising public and private sector organisations on AI strategy, GenAI adoption, and enterprise-scale delivery with a speciality in AI safety in regulated industries. Proven at translating business problems into deployable AI solutions across regulated environments, cloud platforms, and data estates. Trusted advisor to senior stakeholders, combining hands-on technical expertise (LLMs, ML platforms, cloud architecture) with pre-sales, operating model design, and change enablement to deliver measurable commercial and operational impact.

## SKILLS

- \* AI & GenAI Strategy
- \* Solution Delivery Lead
- \* Use-Case Discovery
- \* Responsible AI & Risk
- \* Value Prioritisation
- \* Enterprise Architect
- \* Public Speaking

## EXPERIENCE

### Lead AI Consultant | Nov 2024 – Present

Cloud Formations Ltd

- \* Lead AI and GenAI strategy engagements for public and private sector clients, assessing organisational maturity, data readiness, and technology estates to identify high-value AI opportunities.
- \* Advise senior stakeholders on AI use-case prioritisation, business value, delivery approaches, and adoption risks, supporting pre-sales activity and pipeline development.
- \* Designed enterprise-scale AI and data architectures using ArchiMate and Visio, aligning business capabilities, applications, data, and infrastructure to support secure AI adoption.
- \* Deployed AI solutions utilising Databricks and Azure tools for both clients and internally, with AI agents being developed using LangChain such as an AI Engineer utilising MCP to interact with external 3<sup>rd</sup> party systems
- \* Designed and implemented Deep Learning models with Explainable AI to adhere to regulatory requirements for explainability in Python
- \* Established and scaled the organisation's AI services offering, including solution design, creating go-to-market materials with the Marketing team, client workshops, and executive briefings.
- \* Act as a bridge between executives, delivery teams, and vendors to ensure architectural intent is realised in delivery.
- \* Present as AI SME at industry events, presenting on AI fundamentals, GenAI adoption, and deep learning in regulated environments.

## TECHNICAL EXPERIENCE

- \* Artificial Intelligence
- \* Deep Learning
- \* Machine Learning
- \* Natural Language Processing (NLP)
- \* LLMs
- \* GenAI
- \* Responsible AI
- \* Figma
- \* ArchiMate
- \* Python
- \* R
- \* AWS
- \* Azure
- \* Azure DevOps
- \* Jira
- \* LangChain
- \* ArchiMate
- \* TOGAF
- \* Aha!

### Domain Engineering Lead and Technical Product Manager | Nov 2023

- Nov 2024

Experian

- \* Hybrid leadership role combining technical consulting, product strategy, and platform governance for a national machine learning platform.
- \* Acted as a trusted technical advisor on internal and external engagements, guiding AI platform feature development and customer adoption decisions.
- \* Owned the security and risk posture of the UK ML platform, ensuring compliance with regulatory and internal governance requirements.

## DELIVERY TECHNIQUES

- \* Agile/Scrum
- \* Kanban

- \* Translated client and stakeholder requirements into actionable platform enhancements, balancing speed of innovation with operational resilience.

### **Analytics Domain Architect | Oct 2022 - Nov 2023**

Experian

- \* Led the design and delivery of multiple enterprise analytics applications, from initial concept through to go-live, operating across architecture, delivery, and stakeholder roles.
- \* Identified and remediated 90,000+ infrastructure vulnerabilities, significantly improving the UK Analytics security scorecard and future-proofing releases.
- \* Worked closely with risk, legal, and engineering teams to embed secure-by-design principles into analytics and AI platforms.

### **Lead Analyst | Jul 2021 - Oct 2022**

Post Office Ltd

- \* Led and mentored 15 analysts across three teams, delivering complex transformation initiatives using Agile methodologies.
- \* Directed discovery and redesign of legacy Horizon system processes, identifying issues and producing data-driven solutions to improve user experience.
- \* Presented prototypes and business cases to Postmasters and C-suite stakeholders, influencing investment and budget decisions.
- \* Delivered roadmap planning, prioritisation, and execution across multiple concurrent programmes, resolving ~450 identified system issues.

### **Business/ Data Analyst | Sept 2018 - June 2021**

Capital One

- \* Built predictive models to forecast customer behaviour and outcomes, generating approximately £250k additional NPV.
- \* Improved data quality from ~66% to ~97% by developing automated data pipelines using Python, R, SQL, and Tableau.
- \* Designed and executed A/B testing and campaign strategies, optimising acquisition and risk outcomes.
- \* Reduced operational costs by ~£750k per year through data-driven optimisation of customer engagement strategies.

## **ABOUT ME**

Outside of work, I'm very active and will happily play any sport, having previously competed at an international level in athletics. I'm also highly competitive (to my family's dismay), whether it's game night or bowling. I keep fit through the gym and love taking my dog out on adventures. I enjoy travelling and exploring new places and cultures, which has led to a tradition of collecting a pack of cards from every country I visit, along with an ongoing goal to build Lego Architecture sets from the landmarks I've seen.
